European business has shown high resilience and will emerge even stronger from this crisis

In Numbers

- **Reduction of ~4,000 employees** year-to-date, majority in North America, Northern Europe, and the U.K.
- Currently **~650 employees are still in furlough** schemes (in U.K., Nordics, Germany, Austria), down from **almost 3,000 at the peak**
- „Investment“ of **~70m EUR restructuring** expenses, **full payback within ~2 years**
- Strict cost management involving both temporary and sustainable measures reduced the **SG&A expenses well below budget**, full-year expectation **~€310m, target 2021: <€300m**

Improved cost agility: the positive outcome from a difficult year

Levers

Balanced workforce utilization planning

- Adjusting in-house capacities to **Q1/low point** in quarterly intra-year revenues
- **Switch** from internal to external resources, also using agility of flexible resources from Poland (Bilfinger entity with skilled labor lease, working in various European countries)

➤ Reduce seasonal underutilization to drive gross margin

Split between own resources and external sourcing

Fast alignment with mid-term market outlook

- **Sustainable reduction of personnel** in areas with longer-term subdued outlooks, e.g. oil and gas U.K., North America, targeting operations and SG&A
- Consequent **wind-down unprofitable** business and/or pursuing strategic alternatives, e.g. loss-making areas in Technologies

➤ Starting FY 2021 with a clean cost base
