Business Performance from 1 January to 30 September 2018

- Sales revenues EUR 15.6 million -3.9 %; Q3 EUR 5.3 million +1.3 %
- EBITDA 1,851 kEUR -26.3 %; Q3 288 kEUR -62.4 %
- EBIT 1,263 kEUR -25.6 %; Q3 112 kEUR -77.8 %
- Net earnings of the parent company's shareholders in the period concerned 1,123 kEUR; Q3 -9 kEUR
- Earnings per share EUR 0.23 (2017: EUR 0.23)
- Increased expenses for development services
- Burden due to start-up losses relating to the new plant for capillary production
- apoplex medical signs cooperation agreement with Bristol-Myers Squibb (BMS, Munich)
- Geratherm holding, Protombis, receives funding in the amount of US\$ 10 million

Dear Shareholders and Parties Interested in Geratherm Medical,

During the first nine months of the year, Geratherm registered as a whole a slight -3.9% drop in sales. In a quarter-on-quarter comparison, we managed to close with a slight +1.3 % increase in sales. The start-up losses relating to the new plant for capillary production are currently having a negative impact on the financial results. At the same time, we have increased the development costs at apoplex medical and Warming System significantly. The new capillary production line at the Geschwenda location is slated to start operation on 7 November 2018. After a certain settling-in phase, we are expecting a considerably higher level of sales.

The gross profit amounted to EUR 10.458 million or 66.9 % of sales (2017: 68.0 %) on a nine-month basis. The EBITDA margin of business operations as of 30 Sept. 2018 was 11.8 % (2017: 15.5 %). The EBIT margin was 8.1 % (2017: 10.4 %). The equity-to-assets ratio was 70.0 % (2017: 73.7 %) with a return on equity of 7.5 % (2017: 6.9 %).

The third quarter was considerably weaker in terms of earnings compared to the same period last year. With a +1.3 % growth in sales, the operating result dropped significantly by -77.8 % to 112 kEUR. The result from ordinary business activities was weaker by -75.1 % in third quarter and amounted to 109 kEUR. The lower results are attributed to the temporarily weak performance exhibited by the Warming Systems segment, the higher development expenditure and the start-up costs of the new capillary production.

Facts and Figures (in kEUR)

	III/18	II/18	I/18	IV/17	III/17
Sales	5,256	5,113	5,259	4,776	5,187

EBIT	112	594	557	-1,070	506
EPS (EUR)	0.0	0.14	0.09	-0.09	0.06
Cash flow	149	962	906	-147	1,220

Sales development

Sales development during the first nine months of the fiscal year turned out weaker by -3.9 % than the same reference period last year. The third quarter was with a 1.3 % increase in sales roughly at the same level as last year. Compared to the previous year, it is necessary to take into account that sales were burdened by the temporarily shut-down capillary production since November 2017.

On the European market, our most important sales market, we were able to increase sales by +4.1 %. We also registered a slight jump of +5.4 % on the German market. Sales development on the US market was favourable. Here we managed to boost sales by +41.1 % compared to the previous year. The sales in Other countries experienced a +7.8 % increase. When breaking down sales figures by regions, sales development in the Middle East, which suffered a -51.3 % drop, posted the worst results. Here sales were affected by orders that had to be postponed due to new certification regulations. Deliveries resumed in September, which is expected to offset the decreases. Reducing Geratherm's business activities on the Brazilian market resulted in a substantial drop of -65.2 % compared to the same reference period last year.

Sales by regions 1/1 to 30/9/2018

For the most part, Geratherm Medical's products are marketed internationally. All in all, 83.4 % of Geratherm products were exported during the period under review.

Sales by segments 1/1 to 30/9/2018

The Healthcare Diagnostic segment posted a decrease of -10.1 % during the first nine months of the year. In this segment, we primarily market our clinical thermometers and blood pressure monitors to pharmacies and drugstores world-wide. The drop in sales, as in the first two quarters of this fiscal year, was attributed to our subsidiary in Brazil. Otherwise, sales in this segment developed in line with our expectations, except for some quarterly fluctuations.

The Respiratory segment, in which we offer products for testing pulmonary function, showed a -0.6 % decline in sales during the first nine months. The actual momentum of segment's growth looks very different though. Without the drop in sales posted in Brazil, the Respiratory segment would have been able to report a +18.6 % sales growth. Sales during the third quarter amounted to +26,2 %. As a result of the strong

growth, even in the following quarters, we are currently constructing a new production facility at the Bad Kissingen location. We are expecting to have concluded the building project by late 2019. This shall provide the necessary capacities for the anticipated growth.

The Medical Warming Systems segment managed to increase its sales by +15.3 %. The third quarter's performance was weaker. We are, however, expecting that sales will rebound again in the fourth quarter. With regard to the medical warming systems developed for operating rooms, we are still in the recertification process. Based on the current situation, we assume that final product files will be submitted to the licensing authority by the end of the year.

Sales posted in the Cardio/Stroke segment increased by +22.7 % compared to the prior year. The number of participating hospitals/stroke centers increased to 118 clinics and hospitals (2017: 100). We are currently stepping up our expansion efforts in the other European countries. Bristol-Myers Squibb (BMS) Munich and Apoplex Medical have signed a cooperation agreement to jointly inform about the stroke risk analysis process (SRA) developed by Apoplex. The aim of this cooperation, which was launched in Germany, is to enable a comprehensive primary and secondary prevention of strokes in hospitals and clinics on the basis of efficient interaction of diagnostics and therapy.

There was also good news to be reported with regard to Geratherm's holding Protembis. Protembis develops an innovative catheter-based filter system, which is designed to protect patients from strokes and other neurological complications during interventional cardiology procedures. All in all, Protembis managed to raise US\$ 10 million in the oversubscribed series A level financing in order to get its product ready for the market. The main investor in this financing round is the US-based and listed medical technology group Abiomed. Geratherm Medical was one of the very first investors but it did not participate in this financing round.

Earnings situation

The Geratherm Group generated an EBIT-based operating result of EUR 1.263 million (2017: EUR 1.697 million) on a nine-month basis. Extraordinary burdens included the start-up of the new production facility for manufacturing medical capillaries, the less

favourable results posted by the Warming Systems segment, the higher development costs and approval-related expenses.

The sales-related gross profit margin in the group amounted to 66.9 % (2017: 68.0 %).

Due to the aforementioned extraordinary burdens, the reported gross profit on an EBITDA level declined by -26.3 %. The EBITDA margin for the nine-month period amounted to 11.8 % (2017: 15.5 %). The amortisation and depreciation decreased by -27.8 % to 588 kEUR (2017: 815 kEUR).

The operating result (EBIT) also decreased by -25.6 % to EUR 1.263 million (2017: EUR 1.697 million).

The EBIT margin for the nine-month period amounted to 8.1 % (2017: 10.4 %).

The profits from ordinary business activities decreased by -5.7 % to EUR 1.579 million (2017: EUR 1.674 million).

The financial result of the Geratherm Group amounted to 316 kEUR (2017: -23 kEUR). Interests and similar expenses reduced significantly by -77.6 % to 35 kEUR.

Income taxes weighed on the result in the amount of 528 kEUR (2017: 500 kEUR) and consisted of expenses for current income taxes in the amount of 469 kEUR (2017: 500 kEUR) and expenses from the decrease in deferred tax assets and liabilities in the amount of 59 kEUR (2017: 0 kEUR).

The consolidated net profit for the first nine months was EUR 1.050 million (2017: EUR 1.174 million), resulting in a decrease of 10.5 %. After redeeming the result attributable to minority interests, a net income for the period in the amount of EUR 1.123 million (2017: EUR 1.123 million) was generated for the shareholders of the parent company. The result per share for the first nine months is 23 EUR cents (2017: 23 EUR cents).

Net assets and financial situation

Geratherm Medical enjoys a stable asset situation. The balance sheet total of EUR 28.5 million is essentially formed by equity capital in the amount of EUR 20 million. The equity-to-assets ratio was 69.6 % as of the reporting date (2017: 73.7 %). The return on equity amounted to 7.5 % (2017: 6.9 %). The overall return on investment capital is 5.4 % (2017: 6.2 %).

The company had cash, cash equivalents and securities in the amount of EUR 9.0 million (2017: EUR 12.4 million). The decrease in the liquid funds is attributed to the financing of the new capillary production.

The long-term assets are EUR 8.1 million (2017: EUR 5.5 million). The intangible assets amount to 816 kEUR (2017: 657 kEUR). The shown tangible assets increased significantly by 62.9 % to EUR 6.3 million. The healthy increase involves construction in process, relating to the new capillary production.

Inventories increased by +8.8 % to EUR 7.4 million. In this context, finished products and merchandise accounted for EUR 4.1 million (+17.9 %). The trade accounts receivable increased by +26.8 % to EUR 3.4 million.

The cash and cash equivalents declined by -31.3 % to EUR 6.1 million.

The gross cash flow for the first nine months was EUR 2.017 million (2017: EUR 2.853 million). The cash flow from operations amounted to EUR 440 million (2017: EUR 1.023 million). The cash flow from financing activities was -2,115 kEUR (2017: 201 kEUR).

Research and development

Research and development activities remained essentially unchanged. In the Warming Systems segment we increased development expenses relating to licensing and approval and raised personnel capacities in order to provide a basis for this segment's future success.

Staff

The Geratherm Group had a staff of 207 persons in total as of 30 September 2018 (2017: 207) with 199 employees in Germany (2017: 186).

Outlook

Based on the current situation, we anticipate a positive business performance for the remaining quarter of the current fiscal year. New sales momentum should arise with the launch of the new production of medical capillaries at our location in Thuringia. The segments apoplex and Respiratory are expected to continue to grow. In the Warming Systems segment, we anticipate better sales during the fourth quarter due to the orders received and project invoices for LMT Medical.

Geschwenda, November 2018

Dr. Gert Frank
Chief Executive Officer

Notes on Interim Consolidated Financial Statements for the Period from 1 January 2018 to 30 September 2018

Accounting and valuation methods

The interim consolidated financial statements of Geratherm Medical AG as at 30 September 2018 were prepared in accordance with the rules of the International Financial Reporting Standards (IFRS) valid on the date of the financial statements and in consideration of the guidance provided by the International Financial Reporting Interpretations Committee (IFRIC), as is mandatory in the European Union.

The accounting, evaluation and consolidation principles were maintained, as shown in the Notes to Consolidated Financial Statements for 2017 Fiscal Year.

The valuation of assets and liabilities is based in part on estimates and/or assumptions about future developments. For instance, the assessment of capitalisation requirements for development projects, the statements on economic useful lives for long-term intangible and tangible assets are based in particular on estimates and assumptions. In addition, the assessment of tax deferrals and accruals, the long-term impairment of assets available for sale and the impairment tests of the cash-generating units and assets is based on the corporate planning, which of course involves uncertainties such that the actual values may deviate from the made assumptions and estimates in individual cases. Estimates and the underlying assumptions are regularly checked and evaluated with regard to possible impact on accounting. Exercise of substantial discretionary powers is not available.
